

LIGHTING THE WAY IN ORDER FULFILLMENT

PicRite® CartRite® PutRite® TurnRite®

The combination of our Pick-to-Light systems and Order Fulfillment software provides an automated, highly efficient and paperless method for processing, managing, and handling orders within the warehouse.

CAPE Systems offers the most comprehensive set of order fulfillment systems available. No matter what your order processing requirements are, we have the right pick-to-light solution:

- **PicRite® System** – for flow rack, shelving and pallet flow order picking
- **CartRite® System** – for light-directed batch picking to RF-carts
- **PutRite® System** – for distribution of products to individual carton/store order locations.
- **TurnRite® System** – for carousel picking and order batch processing

All four systems offer a wide variety of light prompt modules and flexible software features to meet your unique requirements including lot control.

Benefits:

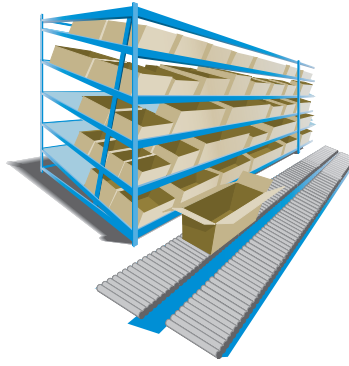

- Faster picking
- Increase productivity
- Eliminate errors
- Decrease order turn times
- Reduce clerical overhead
- Reduce costs
- Minimal training
- Management control
- Expandable for growth
- Real-time order progress and status
- Improved order accuracy
- Improved management controls

KEY FEATURES OF OUR PICK-TO-LIGHT SYSTEMS:

- Windows compatibility
- Pluggable interfaces into leading ERP systems such as SAP
- Seamless integration to backend systems running on virtually any operating system, including Linux, Windows and Unix
- Easy migration path for companies currently operating on legacy picking or warehouse management systems
- Available in a variety of configurations
- High intensity LED displays
- Available with mixed color displays for Piece/Pack or multiple location picking from a single display
- Four, six, eight digit numeric displays with optional beacon
- Eight character alphanumeric displays for lot control
- Snap-together single cable connections — makes reconfiguration easy
- Complete, short, and lot/carton close switches

PicRite®

An industry-proven pick-to-light system that offers accurate, high-speed picking with an easy-to-use operator interface. The system's intelligent light modules quickly guide the picker to the right products and display the exact quantity required for each pick. Our proven *PicRite* systems are available in a variety of configurations, to suit specific installations, with a wide choice of light directed modules.

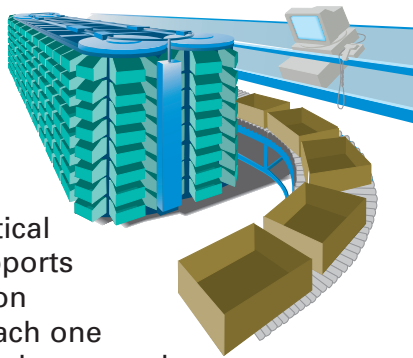

Bay Information Display - BID

Pick Quantity Display - PQD

TurnRite®

Used in all types of carousel batch order processing applications. *TurnRite* controls industry standard horizontal and vertical carousels, and supports multiple workstation operations, with each one consisting of multiple carousels.

Location Quantity Indicator - LQI

Batch Put Indicator - BPI

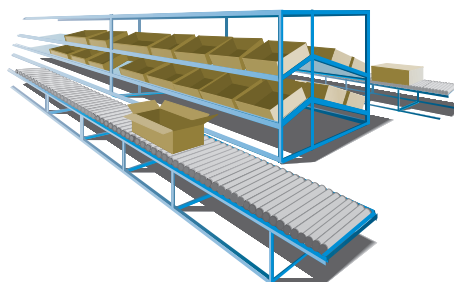

Product Picks By Month

Product Picks By Day

PutRite®

When products are received in full cases and require distribution to fulfill individual store orders, well-proven *PutRite* system guides the distribution of individual products to the appropriate "put" location for each store carton and specifies the exact quantity required.
